

Picture 1

Prompt:A sunny beach, with sand on the left and the sea on the right.

Picture 2

A group of people are having a barbecue on the beach.

Picture 3

Snow covers the ground, and the splendid aurora fills the night sky.

The screenshot shows the interface of an AI image generator. At the top, a blue banner with white text reads: "For Ghibli AI Image Generator please go [here](#)". Below this is a "Text Prompt" input field containing the text: "Snow covers the ground, and the splendid aurora fills the night sky.". To the right of the input field is an "Info" button. Below the input field are buttons for "Add modifiers" and "Negative". To the right of these buttons are "My prompts" and a trash bin icon. Underneath the text prompt is a section titled "AI Models" with a "Show all models" link. It displays a grid of nine AI model cards: DaVinci2 (selected), Realismo, Artflow; Deep Style, Photonic, Ideogram (NEW PRO); Flux (PRO), and AI Vision. Below the models are buttons for "Start Image" (with a camera icon), "Effect - 60%" (with a paintbrush icon), "Resolution" (with a dropdown arrow), and an "Enhance" checkbox. A preview image of the generated aurora scene is shown below these controls. At the bottom left is a "-4 ⚡" button, and at the bottom right is a large orange "Generate >" button.
